PROFILE SUMMARY

Aspiring Data Analyst and Artificial Intelligence and Data Science final year. Skilled in Python, SQL, MySQL, Microsoft Excel, and Power BI, with hands-on experience in AI, Machine Learning, and Data Analytics through internships and academic projects. Passionate about solving real-world problems, learning new technologies, and building practical AI solutions.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science

Expected Graduation: 2027

Indra Ganesan College of Engineering, Tiruchirappalli | Current CGPA: 7.72/10

Higher Secondary Education (Class XII)

Completed: 2023

Government Higher Secondary School, Onthampatty | Percentage: 70% (418/600)

SSLC (Class X)

Completed: 2021

Government Higher Secondary School, Onthampatty | All Pass

TECHNICAL SKILLS

Programming Languages: Python, SQL

Database: MySQL

Data Analysis Tools: Microsoft Excel, Power BI, SSMS 22

Core Concepts: Data Science, Data Analytics, Artificial Intelligence, Machine Learning, Data Visualization, Dashboard creation

AREA OF INTEREST

- Data Analytics – Analyzing data to identify patterns and derive meaningful insights
- Python Development – Developing applications and solutions using Python programming
- Business Intelligence – Transforming data into actionable insights for decision-making
- Data Visualization – Creating visual reports and dashboards for data representation
- Full Stack Development – Building complete web applications using frontend and backend technologies
- Natural Language Processing (NLP) – Developing AI solutions that understand, interpret, and process human language

CERTIFICATIONS

- Data Science Essentials – Fundamentals of data analysis and preprocessing
- Excel Dashboard Creation – Data analysis, charts, pivot tables, and reporting
- Power BI Dashboard Creation – Interactive dashboards and data visualization
- Machine Learning – Machine learning concepts and predictive models
- Artificial Intelligence & Machine Learning – Core AI/ML concepts and model building techniques
- MongoDB Basics – NoSQL database concepts and data management
- Generative AI & RAG – Generative AI and Retrieval-Augmented Generation concepts

INTERNSHIPS

- Data Science Intern — Judah Code Technologies, Trichy | 23 June 2025 – 04 July 2025
- Full Stack Development Intern (Python) — e-Soft IT Solutions, Trichy | 16 December 2025 – 27 December 2025
- AIML Intern — Akilam Technology, Trichy | 04 June 2026 – 25 June 2026

PROJECTS

Multimodal Deepfake Detection System

Tools Used: Python, Deep Learning, TensorFlow, OpenCV, Librosa

- Built an AI-powered deepfake detection system.
- Applied deep learning and OpenCV.
- Performed preprocessing, training, and evaluation.
- Enhanced detection accuracy through optimization.

AI-Powered Resume Analyzer

Tools Used: Python, Machine Learning, NLP, Data Analysis

- Analyzed resumes and extracted relevant skills and information automatically.
- Implemented Natural Language Processing (NLP) techniques for resume parsing.
- Matched candidate skills with suitable job roles and recommendations.
- Improved resume screening efficiency through AI-based analysis.

Human-Following Smart Vehicle

Tools Used: Arduino, Python, Sensors

- Developed a human-following smart vehicle.
- Used sensors for real-time tracking.
- Enabled automatic movement and navigation.
- Integrated hardware and software components.

ACHIEVEMENTS

- Participated in PROJECT PRISM – Kalasalingam Academy of Research and Education (Deemed to be University)
- Participated in SHARK TANK '26 – Kalasalingam Academy of Research and Education (Deemed to be University)
- Participated in Connexion, Treasure Hunt and E-Sports – K. Ramakrishnan College of Engineering

LANGUAGES

English, Tamil
